Managing patients with dry eye disease
Diagnosing dry eye disease

Aims of the courses

1. To build up a program focused on patient's needs and helpful for ophthalmologists
2. To review the results of the literature: each presentation should be based on published data
3. To give the opportunity to participants to ask questions and to interact during case discussion
4. To point out the new developments in terms of treating dry eye disease

Faculty

Stefano Barabino, Italy
Marc Labetoulle, France
Maurizio Rolando, Italy
