

Orbital, Lacrimal and Ophthalmic Plastic Surgery 15 – 18 May 2023, Lisbon, Portugal

Scientific Coordinators: Dr. Ramón Medel, Dr. Luz María Vasquez

SCIENTIFIC RATIONALE:

Reinforce the basic knowledge in the periocular anatomy and clinical examination; Learn how to identify the most common pathologies in the oculoplastics field, to be able to run a proper examination, reach a correct diagnosis and offer the best available treatment ; Experience the different surgical approaches for frequent eyelid problems, such as ptosis, ectropion, entropion, among others. Improve the oculoplastics practice in all participants, from basic and initial practitioners, to more experienced oculoplastic surgeons, given the close contact with experts in the field
